Editors Soapbox Wake Up!!!

Get out and do something for yourself! We have some good meets set up with opportunities to learn, forge or teach others what you know. Come out and chat or get your hands dirty! Let's boost the attendance at the upcoming meets. If you are interested in helping please contact one of the board members listed on page 2.
Larry Brown, Editor

Upcoming events for 2011

Get you calendars out and mark these events down. Please bookmark our web site and check for updated meet information. Remember most of our meets have an "Iron in the Hat" drawing, so be sure to bring something. Meet information starts on this page and continues on page 3.

Sunday, September 9th, 10:00am - 4:00pm Red Mill Tool Swap/Picnic, For more info see this page and check the web site

October 7th Walnford Park, NOTE NEW DATE FROM LAST NEWSLETTER, info on page 3.

November? Trying to set up a workshop, ideas or anvils to be repaired, contact a board member.

December? Holiday Party, date not set yet.

BLACKSMITH HAMMER-IN & TOOL SWAP

**At the Red Mill Museum Village
Sunday, September 9th,
10:00am - 4:00pm**

The Red Mill Museum Village is pleased to announce its annual Hammer In and Tool Swap on Sunday, September 9th from 10-4pm. This event is hosted by the NJ Blacksmith's Association, under the direction of association trustee, Eric Cuper, and our own resident blacksmiths Dave Ennis and Robert Bozzay.

NJBA members who want to demonstrate should contact Dave Ennis and register for a time slot in the schedule so the museum can publicize them and the event

The day's activities will center at the Museum's Blacksmith Shop where local blacksmiths and the New Jersey Blacksmith's Association, a non-profit organization dedicated to the promotion of the art and craft of blacksmithing, will have members on hand to demonstrate and sell their work. Tool dealers and collectors are invited to tailgate, sell and swap their smithing tools and accessories. We are currently registering blacksmiths and tool collectors. Among the items to be found will be anvils, blowers, forges, vises, hammers, and tongs. Should anyone have a "what is it" cluttering up the garage, bring it along and we will be glad to identify it for you.

Red mill information continued on page 3.

Red Mill Meet and tool swap

continued from page 1.

Admission for the day's activities is \$8 for adults, \$6 for seniors, and \$5 for children (6-12). Free for children under 6, museum members and for NJBA members. Included in the price is admission to the Museum's historic buildings and exhibits. The Red Mill Museum Village is located at 56 Main Street in Clinton, NJ. For more information, or to register call the Museum at (908) 735-4101.

Directions:

Red Mill Museum; Take exit 15 on I-78 onto old route 22 going North (routes 513 and 173), make a left onto main street before bridge. Museum straight ahead.

Meet at Walnford Park October 7th, 10am—5pm

We will be demonstrating and holding a membership meeting at Walnford Park on September 30th. Walnford is also known as Crosswicks Creek Park and is in Upper Freehold, N.J. Hammer in and demo at Walnford Park. Please come out especially with your family to enjoy a day at the hidden jewel of the Monmouth County Park system - Walnford park. NJBA will have the trailer with three forges at the demo. We will be immediately across from the working gristmill. There are many activities for children so this is another great family event.

Coordinator David Macauley,
drmacauley@att.net , 732-310-1300

Historic Walnford is the 36 acre Historic District at the heart of Crosswick Creek Park. This

country estate and former mill village provides a window to view more than a century of social, technological, and environmental history in Western Monmouth County.

The site includes a large home built for the Waln Family in 1774, an 1879 Carriage House, and assorted outbuildings and farm structures. Much of the site's interpretation is connected to the newly restored and operating late 19th century Gristmill.

Directions

Directions: Please note: If you choose to do an internet search for directions to this address, be aware that the parking lot on site is not accessible from the Walnford Rd/Hill Rd intersection. Directions below. From the East Via I-195: Take Exit 11 (Imlaystown/Cox's Corner) and turn left onto Rt.43 (Imlaystown/Hightstown Rd). At the first intersection, turn right onto Rt. 526/Red Valley Rd. At the first light, turn left onto Sharon Station Rd and follow approximately 2 miles. Turn right onto Rt. 539 North. Travel a short distance and turn left onto Holmes Mills Rd. Make first right onto Walnford Road which leads directly into the park.. From the West: Follow I-195 to Exit 8 (Allentown), Rt. 524/539. Turn right and follow Rt. 539 through Allentown. Turn right onto Holmes Mills Rd and then right onto Walnford Rd, which leads directly into the park. From the North: Take Rt. 9, 79, or 34S to 537W to Rt. 539 in Upper Freehold. Turn right onto Rt. 539 (Forked River Rd), then left onto Burlington Path Rd. Turn right onto Holmes Mills Rd and then left onto Walnford Rd, which leads directly into the park.

November Workshop?

We want to try to set up a workshop for November so if you have ideas or anvils to be repaired contact David Macauley or Larry Brown, contact info on page 2. More next newsletter or on web site

December Holiday Party

Date not formally set but usually in early December, more next newsletter or on web site.

New Jersey Blacksmiths Newsletter

Reports on NJBA Meets

Tuckerton Seaport Meet

On May 20, 2012 NJBA gave a demo at Tuckerton Seaport. The day was breezy but we didn't get rained out like on past years. We had a good time even though the attendance for the event was a little light. Maybe the economy or the price of gas kept people away? Hopefully next year will be a little better. I like to thank every one who came out, and a special thank you to John Choborda, for coming up from Delaware with his trailer and equipment. Tom Majewski

of food and I think we all got a Stewarts Rootbeer float at some point. I had a great time and thank everyone who lent a hand.

Art All Night in Trenton, NJ Historic Roebling Wire Works Trenton, NJ

June 16th – 17th 2012

AAN was a great fun event that lived up to its billing. We (Larry, Pat, Basil, and I) saw 8 to 10 bands while forging 2 large very different Candela-bras. The music was so loud that we could only talk to the onlookers between bands. That was fine though as the 4 of us had our own mini rave as we rotated around the forge (3 irons in at a time) and worked the anvil one right after the other.

The organizers were excited to have us and they gave us a spot where the loading couldn't have been better. The food trucks had a great array

Dave did the Sunday demo and here is his report.

Molly and I spent part of Father's day at the Art all Night site. I think Molly was more interested in the Rootbeer float than the art, but she did make a collage and a nice little frame for a picture of herself. I forged out some more folded leaves that welded together and a hook. Everything got donated to the public either deliberately or inadvertently (ie I left the pieces at the site when I left)

I thought the event in general was well run and fairly well attended. The bands were too loud for my taste - the audience could not ask questions. On the other hand it was the perfect location to load and unload the equipment. I had no problem starting the forge - thanks for leaving me some kindling. The blower worked perfectly. In general I

New Jersey Blacksmiths Newsletter

could heat pieces quickly to a bright orange, and I could and did weld in the fire. The only thing we really could have used were a vice and a table.

I strongly recommend Eric leading this event again next year. In fact I think we should enter some work. Submitted by David Macauley

**Buffalo Punch
Shear and
Bar Cutter.**

Middlesex County Fair

NJBA provided blacksmithing demos at the Middlesex County Fair from Monday August 6, 2012 through Sunday August 12. We were located between the two agriculture tents, with plenty of room and no immediate neighbors to bother. Power and water were readily available. Jim Etsch, one of the fair trustees really likes having us at the fair and takes good care of us. We used two pop-up canopies which provided plenty of room to support four forging stations. David provided the fourth anvil and the fourth blower.

NJBA was contracted and paid for demonstrations on Monday, Tuesday and Wednesday. On Monday night we had about 6 apprentices working in the tent and 3 NJBA members. We picked up one membership from the fair. As in the past we had a stream of scouts trying blacksmithing all

from troop 10 in South Brunswick. One of the Scouts, a 16 year old life rank, was able to complete a cooking tripod on his own – a good accomplishment. Most of the other scouts loved to make either a nail or a hook. We also had a visit from a member who repaired his anvil with us about 2 years ago. He brought two sons who got a chance to work on some projects.

We distributed probably 50 business cards. The weather was hot but not unbearable. It rained a little on Friday night, but no where near what was predicted. We really lucked out. In general I think we presented a wonderful show to the public, provided plenty of practice time for current and prospective members and recruited new members.

New Jersey Blacksmiths Newsletter

Art Nouveau

by Jill Turman

Oakland, CA

photos by Mike Mumford

Editor's Note. If you weren't there, you really missed out. A huge amount of info went streaming out to the audience. Her demonstration and related discussions have spawned several articles, but even these articles will only scratch the surface of what was presented.

Creating the Concept

Starting Point

- Constraints
- Customer or artist's requirements
- Size
- Style
- Budget/time allowable
- A hot idea I want to play with

Make a full-scale layout on cardboard.

Make it!

Larry Brown, Editor

Volume 17, Number 2
<http://njba.abana-chapter.com/>

A Northern California native, Jill studied art before migrating east to Memphis. There she fell in love with forged iron at the Metal Museum.

Working her way up over 12 years in Memphis, she progressed from apprentice to journeyman to independent shop owner there. Initially, she worked in furniture design, then in decorative and architectural work. Returning to California five years ago, she now owns and operates Bella Ironworks in Alameda.

Doodle lots of ideas.

Once you've selected an idea, make a full-scale layout on cardboard to see if it really works at full scale. Give yourself freedom to tweak it until you're happy with it.

This is the piece made in the demonstration at Wayne's World. Elements of the piece include the saber end, the leaf end and the taffy pull. In this and subsequent articles, we'll address the elements of this artwork.

New Jersey Blacksmiths Newsletter

Elements of the Piece

A complex piece is a collection of simpler elements. Learn to make the elements, and then it becomes merely a matter of combining the elements into the final piece. In this art nouveau demonstration, the main elements are:

- Taffy Pull
- Saber End
- Leaf End
- Wrap Collar

The Taffy Pull Bend

The taffy pull bend is a nice decorative element, creating interest through the variation of line width.

Bend to the inside of curve.

Referring to the full-scale layout of the desired curve, the first step is to bend the stock (1/2" square in the demo) to fit the inside of the curve. The demo used a bending fork in the post vise, along with a bending fork (dog) wrench.

Draw out the outside of the curve.

Do this on the anvil, hammering at an angle so that the metal will move outwards without affecting the inside of the curve. Make sure you keep the outer curve even so that you don't get ugly areas sticking out. The cross section will be a trapezoid, thicker on the inside of the curve while thinner on the outside. And, of course, tweak as necessary to fit the drawing and make it look good.

draw curve outward

Multiply the taffy pull curves.

You will need to take care to keep it aligned, both when you design a multi-curve taffy pull squiggle and when you forge it. A sequence of such bends looks best when the outer bends line up and the sides have a nice rhythmic parallelism.

This is from the May/June 2011, California Blacksmith

New Jersey Blacksmiths Newsletter

This is second article in a continuation of the Art Nouveau articles in the California Blacksmith.
This is from the July/August 2011 issue

Putting It Together - Implementing Your Idea

In the first article of this series, Jill talked about the process of getting from ideas to a finished design. In this article, we're going to look into Jill's approach to implementing the design.

Start with a full-scale layout, which incorporates all of the elements of the design. Jill typically does this on a sheet of heavy cardboard, with notes to herself as needed. Recall from her first article that her approach to design is that a complex design is made up of simple elements. The layout on the cardboard should show all of these basic elements, laid out in relation to each other.

The next step is to make each of the elements included in the overall design. Each element should be checked repeatedly against the layout. To do this while the element is still hot, Jill uses pieces of 1" angle as standoffs to keep from setting the layout on fire. As you work, check, recheck and recheck yet again.

Fit the pieces together as they get made so that the full-scale layout worksheet becomes transformed into a test fit of the final work. The final task? Assemble everything. Then proceed into final cleanup and finishing.

New Jersey Blacksmiths Newsletter

Design Element. Saber End

This was one of several bar-end treatments used in Jill's art nouveau sculpture demonstration. Learn to make the elements. Then combine them into the complex design.

You can select whatever size stock is needed to make the intended final work. In this demonstration, Jill started with 1/2" square stock.

First, to soften the overall design, break the edges, which means to lightly chamfer all the edges of the stock. Jill demonstrated this both with a hand hammer and with a power hammer.

Next, form a slanted tip by hammering at an angle on the far side of the anvil.

Then form a taper on the cross dimension. A slight bulge will form, which will become the back of the curved form.

Now curve the saber. There are two curves needed here, both formed over the horn of the anvil. You'll probably need to work back and forth to get both curved sections right.

The final step is to curve and extend the outside of the saber curve. The approach is to hammer on the outside of the curve, drawing the metal outwards.

New Jersey Blacksmiths Newsletter

This is third article in a continuation of the Art Nouveau articles in the California Blacksmith. This is from the November/December 2011 issue

Collecting Ideas

In the first two articles — all based on Jill's demonstration at Wayne's World in February — we covered Creating the Concept, then Putting It Together. Here, we will step back to the initial point — coming up with design ideas.

Doodles & Floor Doodles

Some would call it brainstorming. Others might say it's semi-randomly generating lots of ideas, to be critically evaluated and refined later. Start with an idea; then let it spin with other ideas. Here's a doodle sheet that Jill showed at Wayne's World. This sheet of paper was large, maybe 3' x 4'. Jill finds that it releases her mind to doodle on her shop floor. Often, after her employees leave for the day, she takes a soapstone and then goes at it all over her shop floor.

She might start with a pleasing squiggle. Then repeat it or reflect it or double it. Or say, "what if ...?" and draw that. Then step over a couple of feet to do a variation. She might start out thinking of a wall or shelf bracket, then say, "You know, two of these would make a good table pedestal."

Inspiration

Where do you start? One approach is to look at reference images of good work in the style of the piece that you want to create. For example, Art Nouveau rich sources can be found in the inexpensive Dover books Art Nouveau Decorative Ironwork by Theodore Merten and Art Deco Ornamental Ironwork by Henri Martinie.

Summing Up

In a short summary, Jill advises:

- Doodle lots of ideas.
- Decide what elements you want to use.
- Don't use all your tricks in one piece.

Editor's Note.

From Jill, I infer that sometimes to be creative you need to break out of your normal routine. I used to work with a guy who would hole up in a hotel for two or three days to break his normal patterns when he needed to get some inspiration. It sorta got him away from the daily minutia which can easily overwhelm creative thought.

New Jersey Blacksmiths Newsletter

Blacksmith Double Calipers

By Steve Anderson,
a MABA member

Handle:

Stock- 1/8" x 1" x 20"

Slit eye.

Saw or hot cut.

Bend one side up and
one side down, then
forge short tapers.

Hammer on the outside
of the split only.

Forge ends.

Fuller over horn with
small rounding hammer.

Taper back about 5"

Claws:

Stock- 2 pieces, 1/8" x 1" x 6-3/8"

Center punch the center
of the 1" x 1" square.

Start drawing down here.
Draw out to 8-3/4".

Round the end.

Drill a 1/4" hole.

Bend. (See pattern)

New Jersey Blacksmiths Newsletter

Eye:

Spread the eye and forge it open over the end of the horn, hitting only on the corners.

Washers:

Stock- 2 pieces 1/8" x 1" x 1"

Trace the washers onto the stock. Drill a 1/4" hole in the center of each. Rough cut and grind to the approximate shape. Place a washer on a 1/4" bolt and secure with a lock washer and nut. Chuck in a drill and turn against a running belt sander to round and bevel the outer edge of each.

Counter sink one to accommodate a 1/4" rivet head and then counter sink the other washer, but not as much for the rivet upset.

Final Assembly:

Fuller over the horn using a small rounding hammer.

Pre-Assembly:

Locate the pivot point for the claws by placing the claw on the handle. Center punch the handle.

Fuller over the horn using a small rounding hammer.

- File and finish the parts.
- Place rivet in bottom washer, attach the bottom claw, then attach the handle. Mark rivet where the handle will sit.
- Dismantle and file grooves on opposite sides of the rivet at the handle position, then use a blunt center punch to force the handle material into the grooves on the rivet. (The rivet must be attached to the handle to allow the claws to move independently: this could also be welded or brazed.)
- File to remove any upset material on handle surface.
- Attach the upper claw and washer. Place index cards between surfaces then rivet (not too tightly at first).
- Adjust the contact of the claws if necessary.
- Manipulate to free the claws (note: if the holes in the claws are slightly larger they will rotate easier.)

New Jersey Blacksmiths Newsletter

Patterns: Actual size.

Additional Sizes:

Handle Stock

Claw Stock

Patented Sept. 21, 1926.

1,600,602

UNITED STATES PATENT OFFICE.

GEORGE SCHRADER, OF BRIDGEPORT, CONNECTICUT.

POCKETKNIFE.

Application filed October 6, 1906. Serial No. 60731.

INVENTOR
George Schrader
BY
Chamblain & Newman
ATTORNEYS

Editors Note: The entire patent can be seen on the US Patent website: www.uspto.gov -search by patent number.

Excerpts from the patent text.

Fig. 1; shows a perspective view of my improved form of pocket knife;

Fig. 2; is an edge view of the same;

Fig. 3; is a back view as seen from the opposite side of that shown in Fig. 2

Fig. 4; shows a side view of the same knife with the blade in open position;

Fig. 5; shows an end view as seen from the near end of Fig. 1;

Fig 6; shows a side view of the knife illustrating a slight modified form of wire handle, and Fig. 7; Shows a further side view of knife including a simplified feed form of handle.

As before suggested the handle is formed throughout of a single piece of heavy wire, that is bent and shaped to form a handle.

Finding the U.S. Patent reminded me of this small pocket knife that was made by Brent Cole, a MABA member- The blade is made of L-6 (a band saw blade) and 5160 for the spring handle.

NJBA Board of Directors Election and Membership Renewal Page

The NJBA bylaws were recently amended to provide for a mail-in ballot for electing NJBA directors. On the other side of this page, you will find your ballot and renewal notice. Please fill out your ballot and return it with your 2012-2013 membership dues. (Note that NJBA elections are not, nor ever have been, by secret vote. Your name is on your ballot so the board can confirm you are a member in good standing and that your vote should be counted – which you can insure by returning your ballot with your dues.) Ballots will be counted 30 days after this newsletter is mailed, so please be prompt in your response.

The NJBA Renewal and Board of Directors Ballot is on the next page. Please fill this out and send in as soon as you can.

The date of your last renewal is on the mailing label!!!

If your date is **2011** or older this is your last newsletter!!!

NJBA Ballot and Renewal

Renewal

Name_____

Address_____

City, State, Zip

Phone Number (s)

Home_____ Cell _____

Email address _____

[☐] My check is enclosed for **\$20** (membership) or **\$40** (business membership).

Ballot

Please check a box for each nominee.

You should vote on all nominees.

Nominee

Nominee

	For	Against		For	Against
